

ABSTRACT OF THE DISCLOSURE: This perdurable
gymnoplexus with its' innate structural integrity is the nexus of
a new paradigm which will accommodate the historical disc
organizations and performance levels, while providing additional
disc groupings capabilities for both enhanced and up to now,
unattainable diversified performance. Thereby providing a choice
as to which disc array is superior for a given roller skating
employment. The structure also supports the necessary
appurtenances that are required for a specific utilization.
